

Adult ICU - Central Venous Line and E-T Tube Tracking Sheet

COUNT DAILY at _____ hrs

Central Line

- Number of patients with central lines
- NOTE: one patient with three central lines: Line count = one for that patient
- Count must be completed DAILY at approximately the same time each day plus or minus 1 hour (the count is a snap shot in time).

E-T Tube

- Number of patients with E-T Tube
- Number of unscheduled removal of E-T Tube (excluding Tracheostomy tube) for the past 24 hours
- Count must be completed DAILY at approximately the same time each day.

SITE:

Day	Date	Total # of patients in ICU	# of Patients with a Central Line	# of Patients with E-T Tube	# of Patients with <u>Unscheduled Removal</u> of E-T Tube
Monday					
Tuesday					
Wednesday					
Thursday					
Friday					
Saturday					
Sunday					

NOTE:

- Central line is defined as a line that ends in a major vessel. PICC's included. (Arterial Lines NOT included).
- Unplanned extubation is defined as unscheduled removal of an endotracheal tube (exclusion of tracheostomy tube) either related to the accidental dislodgement due to care processes or to patient self extubation.

What to do with form:

- Every MONDAY, FAX the completed form to Julie Mojica: FAX # **787-2823**.
- Original copy to be stored at site (CRN or managers office).
